

Christ Church (Church of England)

Infant School & Nursery

Sport Premium Grant Expenditure 2014 – 15

Number of pupils and Sports Premium Grant received from April 2014	
Total number of pupils on roll	180
Total number of pupils eligible for Sports Grant	180
Total amount of Sports Premium Grant received for financial year 2014/2015	£8,600

How the Sports Premium Grant will be used during 2014/2015

We plan to continue to use the Sports Premium Grant to purchase specialist input to enhance and update our teaching of PE as well as investing in more appropriate resources. After a successful first year of Soccer 2000 supporting us we will continue to use them to help us further enhance the teaching of PE and firmly embed the high quality teaching and learning of PE into our curriculum. We will also continue to use some of the grant to support our Yoga intervention sessions targeting specific children with difficulties regarding physical co-ordination and concentration.

Aims

- To enhance the profile, delivery and standards in PE
- To facilitate Professional Development for all staff through coaching and mentoring by Soccer 2000
- To identify and develop children who show an aptitude for PE
- To identify and target intervention for children who show difficulties of coordination and control
- To provide more relevant and up to date equipment to support the teaching of PE

Activities

- We will continue with **three sessions of PE support per week** for the coming academic year to be provided by Soccer 2000
- Two sessions will be divided between Year 1 and Year 2 classes one morning a week. Two Soccer 2000 coaches will deliver PE lessons in line with the requirements of the National Curriculum **alongside class teachers**
- The aim of these sessions is to deliver high quality PE teaching and to provide high quality professional development for teachers.
- Coaches & teachers will also focus (together) on assessing the children's development and any intervention needs.

- The final session will be allocated to both Reception classes once a week.
- We will continue to use the grant to provide once weekly yoga activities (led by a teacher qualified in teaching yoga), for a small number children identified through on-going assessment who require additional support with coordination/control/gross motor skills
- We will use the grant to purchase any additional PE scheme resources as and when required

Cost Breakdown

- Soccer 2000 - £5000 per year
- PE Resources - £1115
- Yoga - £1000 per year
- Cover costs - £1485

Measuring the impact of Sports Premium Grant spending - summary

At the end of the academic year we will use the success criteria listed below to evaluate the impact of the Sports Premium grant on our pupils.

Success Criteria

- **High quality PE teaching by qualified coaches for 1 year or beyond** (*evidenced through formal lesson observations & developments in planning and resourcing*)
- **Relevant, up-to-date schemes of work** support longer term effective teaching of NC & FS Curriculum (*evidenced through planning trawls and lesson observations*)
- **More able & less able children in PE identified and targeted for intervention** (*evidenced through planning trawls, lesson observations and intervention records*)
- **All children making gains in learning** through appropriate PE teaching (*evidenced through planning trawls, lesson observations and intervention records*)
- **New PE equipment that fully matches the school's curriculum** – new resources purchased that match new scheme of work and stored more clearly to help ease of use
- **Identified able children given opportunities to compete in inter school competitions** – through links with local Secondary school (formerly a Sports College) and Soccer 2000 multi–skills in house competition
- **Yoga Intervention** – tracking and monitored progress of pupils targeted for yoga because of issues with fine/gross motor skills/concentration and relaxation
- **Sustainable developments in teaching and learning beyond end of project/funding** (*plans & schemes uploaded onto LP, future lesson observations*)

Evaluation/Impact at end of Academic year 2014/2015

- Soccer 2000 provided 3 sessions a week alongside Christ Church teachers in Key stage 1. During the year teachers took on a range of roles from support/assessor to leader to give them a greater understanding of the way Soccer 2000 work when delivering PE. All staff involved feel clearer in their role and formal observations demonstrated a range of areas of strength. We feel that these areas of strength relate directly to the support and input of the Soccer 2000 coaches.
- All schemes of work are now complete and are relevant to the new National Curriculum. They allow for progression (multi-skills) and give the pupils across the school the opportunity to engage in a wide range of sports activities.

- Through the new assessment system we are able to more easily identify our most and least able pupils. From this we are able to tailor the activities within a lesson to best suit their needs. We have also used this information to provide additional support for pupils with fine and gross motor skills problems (i.e Cool kids/Yoga).
- The Sports premium allowed us to update our PE resources and ensure that pupils are fully resourced for all of their timetabled activities.
- 12 of our most able Year 2 children (6 boys and 6 girls) were selected to represent the school in a multi skills cluster group competition. They were selected after achieving the highest scores in our inter school competition. The pupils won the cluster group competition at Smestow School and were then entered in the Wolverhampton multi skills challenge against 12 other winners. In the end the children came 4th and just missed out on moving to the West Midlands competition. Both pupils and parents thoroughly enjoyed the extracurricular competitions and we hope to continue with this again next year.
- Yoga took place every term with 11 or 12 pupils selected to support them with help in their fine/gross motor skills, concentration and relaxation. All enjoyed the sessions and benefitted through the range of teaching techniques. 56% of the children achieved above average scores for concentration, 65% achieved above average scores for relaxation and 50% achieved above average scores for posture/movement at the end of their project, whilst all of the other pupils met the expected level for their age.
- We believe with the support of Soccer 2000 the developments are now embedded into our school and we feel that they are sustainable beyond the funding because of the way the funding has been specifically targeted to maximize teacher and pupil support.
